

NEW MOTORWAYS NEED SHORROCK PERFORMANCE

Shorrock supercharger installation in the ANGLIA 105 E gives a neat appearance and does not impair accessibility to any part of the engine

Speed, acceleration and instant response to all demands on an engine is the dream of every medium car owner. Shorrock have made that dream come true. Shorrock Superchargers impart as much as 50 per cent MORE POWER to the FORD ANGLIA 105 E giving an overall performance which is almost unbelievable.

PERFORMANCE FIGURES

NEW FORD ANGLIA 105 E

M.P.H.	UN-SUPERCHARGED	SUPERCHARGED
--------	-----------------	--------------

0-30	6.2 secs	4.1 secs
0-40	10.0 secs	6.5 secs
0-50	14.7 secs	10.0 secs
0-60	22.0 secs	14.5 secs
0-70	40.0 secs	22.25 secs

Acceleration through the gears

M.P.H.	UN-SUPERCHARGED	SUPERCHARGED
--------	-----------------	--------------

30-50	16.1 secs	9.1 secs
40-60	—	10.5 secs
50-70	—	11.4 secs

Acceleration in Top Gear

MAXIMUM SPEED

73.8 M.P.H.

91.4 M.P.H.

Fuel consumption at constant 60 m.p.h. un-supercharged 37 m.p.g.
Standing quarter of a mile 20.6 secs supercharged

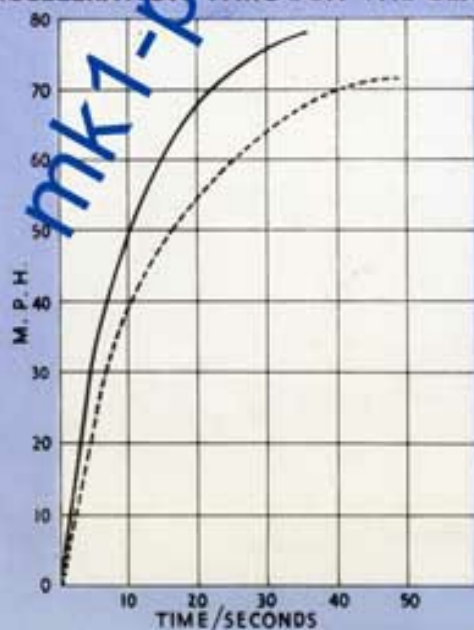

Fuel consumption at constant 60 m.p.h. supercharged 32 m.p.g.

The un-supercharged figures are taken from the "Motor" Road Test, 1960

ACCELERATION THROUGH THE GEARS

Standard Engine

SHORROCK SUPERCHARGED

These two charts show the increase in power which is obtained from the Ford Anglia 105 E engine when fitted with a SHORROCK Supercharger.

Standard Engine

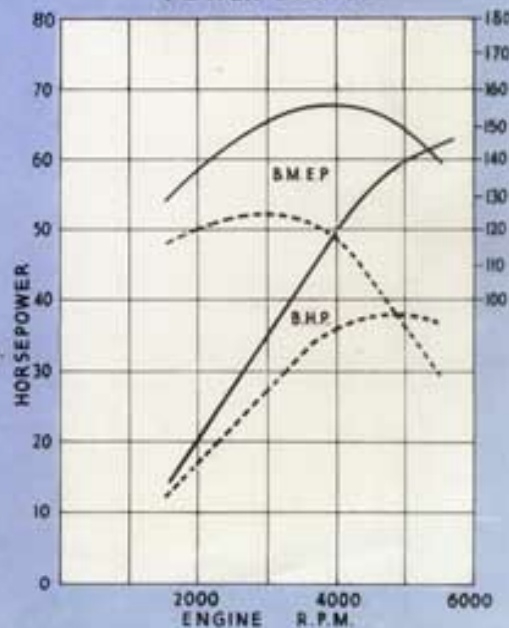

SHORROCK SUPERCHARGED

MAXIMUM SPEEDS

Standard Engine 73.8 m.p.h.

SHORROCK SUPERCHARGED 91.4 m.p.h.

POWER CURVES

SHORROCK *literally transforms the Anglia!*

- Up to 50 per cent increase in power
- Sports car acceleration
- Improved engine flexibility
- More hills taken in top gear
- Less gear changing
- Higher cruising speeds

The Shorrock Supercharger gives up to 50 per cent more power to the Anglia 105 E. This means snappier "off-the-mark" acceleration and vastly improved performance in all the gears, especially top. For those not in a hurry, the car is more flexible, gear changing is reduced (more hills taken in top) meaning less fatigue and more enjoyment.

With all this, low pressure charging as used by Shorrock has been proved to prolong the life of the engine! Equal cylinder distribution preserves exhaust valves and the oil which mixes with the petrol to lubricate the supercharger also serves to reduce cylinder wear, especially when starting from cold.

SUPERCHARGER INSTALLATION

FORD ANGLIA 105 E

POWERBIRD

Including carburettor and all fittings.
No modification to engine. Fitting extra

Boost gauges and other accessories can
be supplied as optional extras.
