Atherstone,
Warwickshire.

Dear Sir,

We thank you for your letter of the 3rd instant, concerning your interest in modifications for the 848 c.c. Mini for Formula Mini Seven use.

The best cylinder head for your purpose would, as you suggest, be the 12G 295 prepared to give a compression ratio relevant to the camshaft you are using, but we regret that we cannot ourselves supply a modified cylinder head as a single item, only as part of a complete engine preparation, with which we would in any case prefer to use an S.U. carburettor.

We have enclosed a quotation covering the type of work involved in completely preparing the engine, which may be of interest to you.

Assuring you of our best attention at all times.

Yours faithfully,
for DOWNTON ENGINEERING WORKS LTD.

David W. Miller
