RALLY WINNING CAR RIDES HIGH

When the 1964 Monte Carlo Rally winning car, a Morris Cooper "S", its driver Paddy Hopkirk (right) and co-driver Henry Liddon visited Fort Dunlop, Birmingham, England, recently, what could be more appropriate for a show platform than this giant earthmover tyre!

Dunlop manufactured the mini-car's tyres and also produced the platform tyre, the biggest made at Fort Dunlop and weighing one ton.

The earthmover tyre is more than double the price of the standard British mini-car.
