Westmoreland.

Dear Sir,

Very many thanks for your enquiry of 28th February and we note that you require a re-worked cylinder head for your 1310 c.c. Cooper 'S'. We enclose herewith a copy of our catalogue and you will see that ~~you~~ list a stage 1 and Stage 11 cylinder head for the Cooper 'S' and this can be supplied either with or without valves. We note your particular requirements and confirm that we shall be able to machine either the Stage 1 or Stage 11 head to the specification that you stipulate and there would be no additional charge to carry out this work and delivery would be approximately seven days from receipt of your order. The cost of matching an inlet manifold to the ports on the cylinder head and to take $1\frac{1}{2}$ SU carburettors, flowing and polishing is £2. 0. 0. exchange.

If there is any further information that you require please do not hesitate to contact us and meanwhile we look forward to receiving a possible order from you.

Yours faithfully,

DAVID OLDHAM.
