you for your specific requirements*

**IMPORTANT  
INFORMATION**

RESTALL seats are offered in **Black** only, thus avoiding confusion over shades in other colours. All seats can be trimmed in sheepskin, black or beige, subject to special order. We avoid trying to follow car original trims which are usually unobtainable when required.

RESTALL Seats are normally provided complete with adjustable 'fore & aft', extra travel, floor runners, a great improvement where no such arrangement is available with an original seat. The actual seating position is usually one inch lower than Standard.

RESTALL reserve the right to make any alteration in design or specification of any model without notice and to deliver goods conforming to the altered design or specification in fulfilment of any order.

RESTALL Seats are offered to fit specified Cars as stated (or see separate Base Frame list for complete range) by means of detachable base-frames or **fixed** special fittings as necessary. Usually applied in both cases to the bottom half of the Floor Runners. The car original floor fixings are made use of where possible. It is possible for the seats to be used in alternate vehicles where suitable separate base frames are available.

**WHEN ORDERING PLEASE STATE  
MAKE AND DATE OF VEHICLE AND  
WHETHER LEFT HAND, RIGHT HAND  
OR BOTH FRONT SEATS ARE REQUIRED.**

BY

TO ADD DISTINCTION AND TO INCREASE YOUR PRIDE IN THE CAR OF YOUR CHOICE

ALL OUR SEATS ARE NORMALLY SUPPLIED COMPLETE WITH ADJUSTABLE FLOOR RUNNERS

Suitable Base-Frames are available as appropriate for specified vehicles. See price list.

**TYPE 1** Years of development have produced this amazing seat, for the enthusiast. It provides the ultimate in comfort and stability. The design incorporates lateral support wings which locate the driver (and passenger) under the most rigorous cornering and being held firmly in position he becomes part of the car and free to concentrate on vehicle control.

App. Weight 18 lb.

**TYPE 2** Developed for the motorist who will appreciate the supreme comfort usually associated only with expensive cars. The infinitely variable adjustment of the back-rest through 60 degrees eliminates fatigue for driver or passenger. The simple over-riding lever mechanism then reclines the back rest as far as possible for complete relaxation when necessary. Long tiresome journeys become a pleasure.

App. Weight 32 lb.

**TYPE 3a** Type '3a' provides the virtues of lateral support without the inconvenience of a full wrap-round bucket seat. Moulded in glass-fibre and contoured to provide correct seating position, it gives a light but immensely strong structure. The neck rest is covered in soft cloth.

App. Weight 14 lb.

**TYPE 4** Provides all-round un-restricted support. Moulded in glass-fibre and contoured to provide correct seating position, it gives a light but immensely strong structure. This when combined with the very latest P.V.C. materials affords the ultimate in seating comfort, at low cost.

App. Weight 15 lb.

**TYPE 5** Designed for the sporting motorist. Immensely strong tubular construction. The driver, being firmly located is free to concentrate on the control of the vehicle. This seat offers not only full lateral support, but also a high degree of comfort and security.

App. Weight 20½ lb.

**TYPE 8 Mk. II** Possibly the ultimate in studied comfort and safety; this seat provides all round support, just where needed; restriction of movement being avoided for most users. Trimmed in high grade soft P.V.C. (Black) the bearing surfaces are of stain-resistant brushed nylon. Built with a full reclining back adjuster; an armchair for the discerning motorist. Complete with sockets for A1818 Head Restraint.

App. Weight 34 lb.
