

Appendix

CAR BASEFRAME LIST

- Each seat is supplied complete with Adjustable Floor runners, where necessary.
- In order that Seats can be fixed in specified Cars, we offer separate **Base Frames** (as below) if the necessary space is available between the Seat and the floor of the Car. These Base Frames are made to be bolted on to the bottom section of the floor runners. The base frames themselves make use of the car original seat fixings. The adjustable runners operate between a Seat and the top of a base frame. As you will see, these base frames cannot, except by accident, be interchangeable from one car to another.
- It will be seen that anyone buying a Seat for Cars can use such a seat in another car if a separate base frame is available for the other vehicle.

BASE FRAMES (Separate) for Type (1), (2), (3A), (4), (5), (6), (7), (8) and (9) Seats.

Note: Type (2), (6), (7), (8) and (9) Seats cannot be used in Drop-heads.
