

INSTRUMENTS AND ACCESSORIES

special
equipment
for your
motor car

"When you go racing you need really accurate instruments. All BRM Formula Racing Cars are fitted with Speedwell Transistorised Competition Revcounters as original equipment".

Graham Hill

Speedwell Instrumentation

Speedwell products are designed to improve your motor car and make up for the unavoidable deficiencies of a mass produced vehicle. Here is a most comprehensive range of instruments for the enthusiastic motorist who wants to know exactly what his engine is doing at all times.

Proper instruments are in fact, essential for modern day motoring. Temperatures can quickly rise after several hours of motorway travel; this, in turn, results in loss of oil pressure and the risk of serious engine damage.

Accurate Water Temperature and Oil Pressure gauges can give you adequate warning of such dangers. Driving at night during winter months will put quite a load on the battery with possibly, heater fan, radio, headlights and auxiliary lights all switched on. You might be travelling at such speed that the dynamo cannot keep the battery charged. The result is a non starter next morning.

An Ammeter will tell you exactly what the dynamo is doing, enabling you to take necessary action, either by changing to a lower gear, thereby increasing engine rpm and charging rate, or switching off one or more accessories to minimise battery discharge.

Probably the most important instrument of all is a Revcounter or to use the proper technical term, a Tachometer. The function of this vital instrument is to indicate the number of engine revolutions per minute, (rpm). Smaller engines are normally designed to turn at higher rpm than larger ones. For example, a Mini engine in standard form is quite happy at 5000 rpm which is nearly equivalent to its maximum speed, approx. 70 mph., whilst a Jaguar engine at this

road speed is only turning at 2600 rpm. All engines are designed to give their maximum power and torque between a certain range of engine revolutions, only by having correct indication of engine rpm can the driver take full advantage of the maximum performance or economy potential of his car, because he will know exactly at what speeds to change gear.

Up to a few years ago, Revcounters were driven by a mechanical drive from the engine, similar to a speedo cable. Recent advances in the electronics field have made this unnecessary as modern tachometers are fully transistorised, requiring only electrical connections which enable the instrument to count ignition impulses translated into engine rpm by the electronic circuit.

Speedwell were the first company to produce a fully transistorised unit of this type and still hold an undisputed lead in this field. Two models are available. The "Standard" type for all normal motoring requirements and the "Competition" instrument suitable for racing, engine testing where unequalled accuracy measurement of engine rpm is required.

Speedwell Instruments in their design and construction outclass other proprietary makes in legibility, accuracy and reliability. All gauges incorporate internal illumination and are easy to fit. Their beautiful design will enhance the interior of any motor car and a comprehensive range of mounting brackets, dash boards and panels is available, together with various engine adaptors, making it possible to fit Speedwell Instruments to nearly every type of motor vehicle.

Publication No. 2

Accessories

Speedwell offer a wide range of special accessories to personalize your motor car, making it more efficient and enjoyable to drive. The outstanding feature of the Speedwell range is that each item has a useful function, is well designed and manufactured to a very high technical standard.

Speedwell Carburettor Accessories not only improve the appearance of the engine, making it a pleasure to open the bonnet, but more important, improve performance and efficiency of the carburettor and, of course, the engine. These parts are suitable for all cars fitted with S.U. Carburettors.

Light Alloy Wood-rimmed Steering Wheels are probably the most widely known sporting accessory. Speedwell wheels are individually designed for each make of motor car and are undoubtedly the finest available.

All the other accessories in this leaflet, such as Horns, Lamps, etc. are, of course, suitable for fitting to any make of private or commercial vehicle.

Speedwell Manual and Ordering Procedure

For further details of the complete range of Speedwell equipment plus tuning hints etc., you need the Speedwell Manual, a book about safe and faster motoring which is priced at 8/6d. An order card is attached to the back cover of this pamphlet. Speedwell equipment is available from your nearest accessory shop, garage or Halfords branch. If in difficulty we would be pleased to supply the name and address of your nearest stockist.

Speedwell Performance Conversions Ltd Speedwell Centre Cornwall Avenue London N3

Electronic Revcounter "Standard" Type

Fully transistorised Tachometer from 0 to 8,000 rpm, suitable for 6 or 12 volt negative or positive earth operation. Models available for 4 or 6 cylinder cars. Internally illuminated, supplied complete with universal mounting bracket, (see also page 7), connecting cable loom and full fitting instructions. Requires $3\frac{1}{2}$ " diameter hole for panel mounting. Best value for money — fully guaranteed.

Part No.

For 4 cylinder cars	IT.TCS4.12
For 6 cylinder cars	IT.TCS6.12
For Volkswagen	IT.TCS4.6VW
For other rear engined vehicles a 15 ft. loom will be supplied by adding letter "L" to part number (5s. Od. extra).	

PRICE £10.15.0

71525

78448

Electronic Revcounter "Competition" Type

This fully transistorised precision Tachometer is the best of its type in the world. Aircraft quality movement, dust proof and splash proof case, printed circuit, a 'must' for the serious Rally and Racing Driver and for engine testing purposes. Suitable for positive or negative earth operation, supplied complete with anodised bezel and cable loom plus special mounting lugs to enable the instrument to be fitted to an existing 4" panel aperture. 3 1/8" diameter body.

Part No.

- For 4 cylinder cars 12 volt 0-8,000 RPM IT.TC4.12
- For 4 cylinder cars 6 volt 0-8,000 RPM IT.TC4.6
- For 4 cylinder cars 12 volt 0-10,000 RPM IT.TC4.12-0
- For 6 cylinder cars 12 volt 0-8,000 RPM IT.TC6.12

PRICE £17.10. 0

Water Temperature Gauge

A special feature of the Speedwell Temperature Gauge is that the 5 ft. capillary tube is encased in plastic, which means that there are no risks of short circuits when running the tube through the dashboard to the engine compartment. Scale reads 40°C - 120°C

CARBURETTOR ACCESSORIES

Ramstacks

Lowest priced performance improvement on the market. Speedwell Ramstacks increase air flow to the carburettor. Speedwell pioneered this type of carburettor intake which was developed after extensive dynamometer testing. Chrome plated finish for $1\frac{1}{4}$ " and $1\frac{1}{2}$ " S.U.'s Polished Alloy for $1\frac{3}{4}$ " S.U.'s

Part No.

For $1\frac{1}{4}$ " S.U.	CA.82	PRICE 19/6 each
For $1\frac{1}{2}$ " S.U.	CA.83	PRICE £1.1.6 each
For $1\frac{3}{4}$ " S.U.	CA.84	PRICE £1.3.0 each

Flojet

This new Speedwell accessory eliminates float level problems which usually cause 80% of carburettor tuning difficulties. The Flojet is a direct replacement of the original float valve and incorporates a Viton tipped needle with unique sealing properties. Gives better fuel economy and retains carburettor tune. The Flojet is suitable for all types of S.U. carburettors.

Part No.	CA.90	PRICE 12/6
----------	-------	------------

Dashpot Cover

Give your engine a little extra glamour with a mirror finish Dashpot Cover. Simply slips over existing carb, fitted in a few seconds. Designed to complement the chromium plated Ramstacks. At the moment available only for $1\frac{1}{4}$ " and $1\frac{1}{2}$ " S.U.'s.

Part No.

For $1\frac{1}{4}$ " S.U.	CA.92	PRICE 7/6 each
For $1\frac{1}{2}$ " S.U.	CA.93	PRICE 9/6 each

STEERING WHEELS

14

78475

Light Alloy Wood-Rimmed Steering Wheels

The Speedwell range of Light Alloy Steering Wheels is designed for the connoisseur driver. This is the only wheel with a solid steel ring inserted in the laminated beech rim. The alloy spokes are actually riveted to this steel rim, making the whole construction completely safe, yet with adequate flexibility. The aluminium spokes are highly polished, giving the wheel a really beautiful and attractive appearance. With one or two exceptions all the wheels are supplied complete with hubs of aluminium or plastic which are fitted to the wheel, therefore no additional assembly is required and normally the original horn button arrangements is simply transferred to the new wheel. In some instances where a horn ring is used on the car it is necessary to fit the horn button from an earlier model. A typical example of this is the Volkswagen.

Wood-Rimmed Alloy Steering Wheels are available for the following cars:—

BMC Mini range, Cooper and Cooper "S"	SW.3.A1	£8.10.0
Sprite Mk. 1 and 2 and Midget Mk. 1	SW.3.A5	8.10.0

SPEEDWELL GUARANTEE

Cars . Components . Engines . Suspension

The goods supplied by Speedwell Performance Conversions Ltd., (hereinafter called the "the Company") are supplied with the following express guarantee;

1 For the purpose of this guarantee the term "Goods" means and includes any new Speedwell Modified Vehicle, supplied by the Company and includes replacement parts and other equipment manufactured or supplied by the Company with the exception of tyres, speedometers or electrical equipment or proprietary articles or goods (including coachwork) not of the Company's own manufacture although supplied by the Company.

2 For a period of 12 MONTHS from the date of which Goods are delivered to the first owner-user, the Company will exchange or repair any part which needs replacing or repair by reason of defective material or workmanship.

3 The Company will not be responsible

for any expense which the owner-user may incur in removing or having removed, or replacing or having replaced, any parts to be sent for inspection or in fitting or having fitted any new parts supplied in lieu thereof.

4 No claim for exchange or repair can be considered unless the person claiming:

a) Immediately upon discovery of the alleged defect returns the part or parts complained of carriage paid to the Company or the dealer from whom the parts were purchased.

b) Sends particulars of the Vehicle or chassis number and engine number of the Vehicle.

c) Sends full particulars of the claim and the reason therefor, stating in such particulars the date of purchase and name and address of the person or firm or company from whom the Goods were purchased.

5 No claim for exchange or repair under the terms of this guarantee may be made

in respect of:

a) Any Goods used

(i) For racing, rallying and/or record attempts, or

(ii) For any other purpose than the private or genuine commercial use of the owner-user.

b) Any Goods which in the opinion of the Company have been injured by wear and tear, neglect, or any form whatsoever of improper use.

c) Any Goods which have been altered in any way, or to which any part not sold or approved by the Company has been affixed.

6 The responsibility of the Company is limited to the terms of this guarantee and it shall not be liable for personal injuries, damage, or loss arising from any defects.

7 The judgement of the Company in all cases of claims shall be final and conclusive and the claimant shall accept its decision on all questions as to defects and the exchange of a part.
