

APPLICATION OF RESTALL SEATS TO VARIOUS VEHICLES (Section. 'A' only)

1. Each Seat is supplied complete with Adjustable Floor Runners.
2. In order that Seats can be fixed in specified Cars, we offer separate Base Frames if the space is available between the Seat and the floor of the Car. These Base frames are made to be bolted-on to the bottom section of the floor runners. The base frames themselves make use of the car original seat fixings. The adjustable runners operate between a Seat and the top of a base frame. As you will see, these base frames cannot, except by accident, be interchangeable from one car to another.
3. On the other hand, where there is **not** sufficient space to use a detachable base frame, as in the case of most Sports Cars, then we weld-on suitable brackets etc. to attach to the car original seat fixings.
4. It will be seen that anyone buying a Seat for Cars as per para (2) can use such a seat in another car if a separate base frame is available for the other vehicle.
5. Below is a list following the above, together with a separate list showing separate base frame identifications for your convenience.

Section 'A'**BASE FRAMES (SEPARATE) for Type, (1), (2), (3A), (4) & (5) seats**

AUSTIN A40	HILLMAN IMP	SUNBEAM IMP
