REST

Type 3A

Restall Engineers have developed this completely new seat for you (the discriminating motorist). By selecting the best attributes from our other seating and incorporating these with the very latest production techniques our TYPE 3A is introduced to provide the virtues of better support without the inconvenience of a full shoulder harness seat.

Available in glass fibre and reinforced neoprene correct seating position. It gives a firm but forward slant structure. This when combined with the very latest P.V.C. material allows the utmost in seating comfort, at low cost. The seat itself is covered in soft cloth.

This seat is available in black and white and manufactured to fit the original mountings in many vehicles. See separate data plate for.

The Company reserves the right to make any alteration in design or specification of any model without notice and to design goods conforming to the latest design or specification in fulfillment of any order.
